

KOMBIS TMM 8008

AUTOMATIC LAMINATE TUBE MAKING MACHINE

Flexible production.
Adaptability is an advantage.

Find us at:
kombis.net

1 Header&Capper

- Heating and sealing possible in one or two stations
- Top-seal option available
- Screw-on/push-on/flip-top cap compatible

2 Body Maker

- Longer mandrel for better side seam(KOMBISEAM™)
- Stable laminate guide
- Cooling for ovality correction

3 Unwinding

- High-tech camera for laminate guide either by design or edge

ABL & PBL compatible

Modular Design

Remote Monitoring

Patented technologies (KOMBISEAL™ and CAS)

Benefits

- Energy efficient high frequency welding technology
- Suitable for thinner plastic packaging
- Designed for frequent tool change
- Easy integration of additional modules or upgrades
- High added value product

Options

- Top seal
- Additional tooling (round/oval)
- Automatic pre-hoppers
- Statistical data HMI integration
- Automated tube packaging machine KOMBI TBM

Tube Boxing Machine ↓
Designed to ease the packing process.

TECHNICAL DATA TMM8008

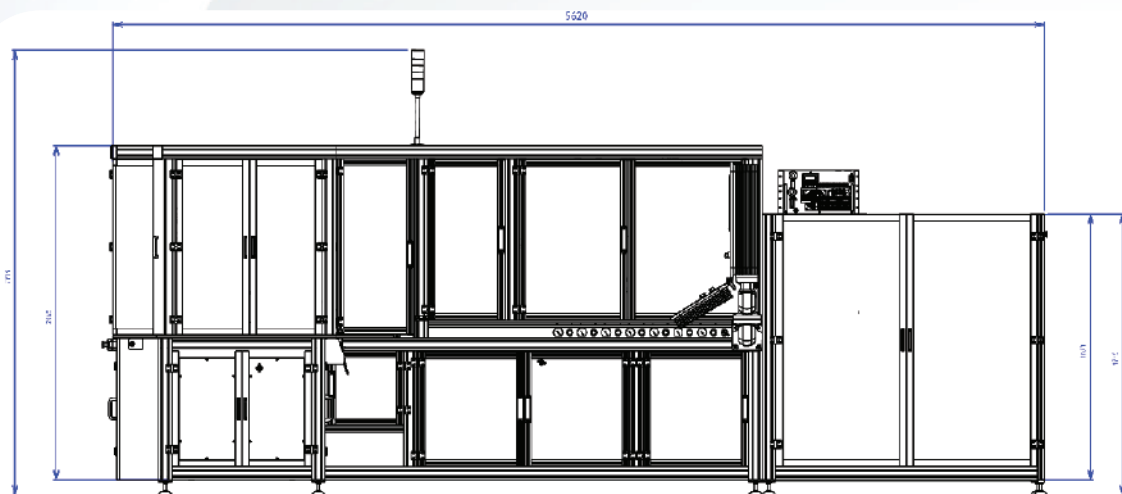

Tube diameter	16 - 50 mm
Tube length	80 - 200 mm
Speed up to	85 tpm
ABL foil thickness	175 - 330 µm
PBL foil thickness	220 - 380 µm
OEE	>85%
Approximate weight of the machine	6-8 tonnes

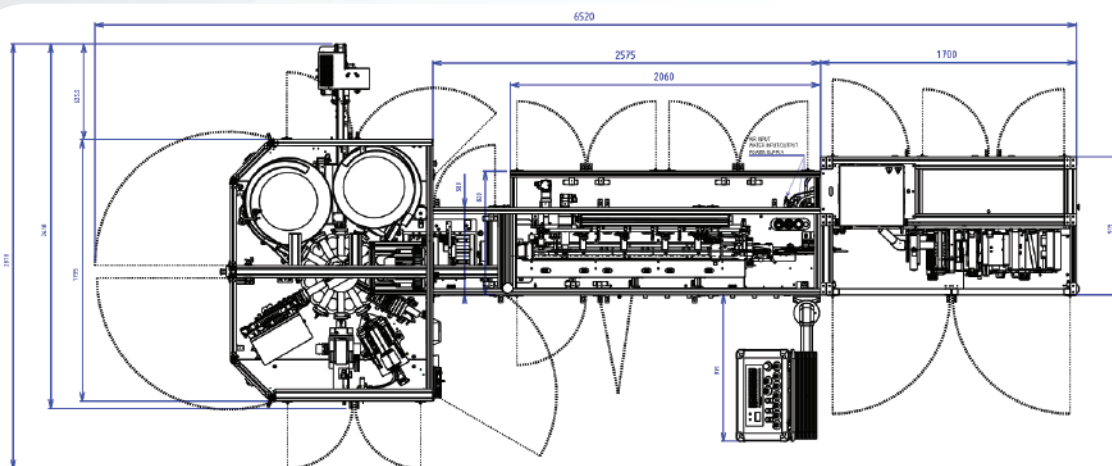

IMPORTANT NOTES:

1. Technical parameters have been tested and validated under Mechatronica's standard operating conditions.
2. Samples may be requested to perform preliminary tests and confirm process feasibility.
3. Please note that tooling compatibility may vary depending on sample size. For significant size variations, additional or customized tooling may be necessary.
